

# High Intensity Aviation Warning LED Lights (Colour: White)

## Specifications

Name of the product : LED IP65 Weather Proof, 24x7 flashing, type A, High Intensity Aviation Obstruction Light

### **comprising**

**a) HI Light Unit**

**b) HI Light Control Unit**

**c) Photocell**

in compliance to

ICAO annexure 14 (Vol-1, Chapter-6)

Protection System : IP 65

Light Intensity : 2,00,000 cd  $\pm$  25% Day time  
20,000 cd  $\pm$  25% Twilight  
2,000 cd  $\pm$  25% Night

Lamp Life : Minimum 50,000 Hrs

Vertical Beam Spread : 4 - 7 degree adjustable

Horizontal Light }  
Emission visibility } : 360 degree

Flash Synchronization : **40-60 fpm**

LED protection including }  
blackout Circuit } : Should be Available.

**Light Failure indication for remote monitoring through potential free contact**

Operating Voltage : 220 V ac – 240V ac, 50 Hz

Wind speed sustainability : 150Kmph

Warranty : One Year and above

Light Cover : Borosilicate Glass

Material of construction : Cast Aluminum/ Die cast Aluminum/ Aluminum  
Silicon alloy

Accessories : Control box should be located on the ground
